2021 PRINT PUBLISHING SCHEDULE

Written and edited by a team of experienced journalists, *Canadian Healthcare Technology* is a source of information for decision-makers in hospitals, continuing care facilities and home care organizations. It breaks the news about important projects and technologies, and provides healthcare executives and senior managers with an excellent source of information for improving the delivery of healthcare, evaluating their own projects and comparing their IT performance with others. The magazine also offers analysis and opinion from healthcare authorities and technological pundits.

Along with the news and opinion columns, each issue contains an in-depth Feature Report, consisting of several articles on a particular topic. The articles examine how hospitals and other healthcare providers are implementing new technologies, and how the solutions have affected their organizations from both a clinical and business point of view. Additionally, a shorter feature section, the Focus Report, evaluates trends and developments. Each year, in the June/July issue, we include a directory of leading suppliers of computerized products and services to the healthcare community.
